

Project: Bangla Puzzle
Date:6/10/2023
Test Environment: JMeter
Reported By: Md Ahsan Habib

Dear,

I've completed a Stress test on a frequently used API for BanglaPuzzle.com
Test executed for the below mentioned scenario.

1000 Concurrent Request in 15s Load; Avg TPS for Total Samples is ~ 67 And Total Concurrent API requested: 1629.

1005 Concurrent Request with 15 Loop Count; Avg TPS for Total Samples is 68 And Total Concurrent API requested: 1735.

While executing 1005 concurrent requests, found 1005 requests got connection timeout and error rate is 100%[website was down].

Summary: Server can handle almost concurrent 1001 API calls with almost zero (0) error rate.
Please find the details report from the attachment and let me know if you have any further queries.
